The first of these is the fact that the number of people who are employed in the service sector has increased steadily since the 1970s. This is due to a number of factors, including the fact that the service sector is now the largest sector in the economy, and that it is growing faster than the other sectors. This is due to a number of factors, including the fact that the service sector is now the largest sector in the economy, and that it is growing faster than the other sectors.
